- Meticulous web developer with over 1 year of front end experience and passion for responsive website design and a firm believer in the mobile-first approach. UDACITY certified. Implemented new responsive website approach which increased mobile traffic by 20%.
- Some of the specific job responsibilities that are taken up by these developers include writing a well designed testable code, creating website layout or interface using HTML or CSS,
- Integrating data from back-end services, creating and maintaining software documentation, maintaining, expanding, scaling and modifying the website, collaborating with other web designers for matching Visual designing intent.
- Developing many e-commerce platforms for private companies seeking an online presence and assist with online sales and reports.
- An email template is an HTML file. This is **the code that outlines the structure and data of a campaign.**

NOVEMBER 2015-PRESENT

Marketing executives oversee many aspects of a campaign throughout the entire lifespan of a product, service or idea. As such executives are likely to have a great deal of responsibility early on and will be required to manage their time and duties themselves. These responsibilities can include:

- overseeing and developing marketing campaigns
- conducting research and analyzing data to identify and define audiences
- devising and presenting ideas and strategies
- maintaining websites and looking at data analytics
- updating databases and using a customer relationship management (CRM) system
- Managing campaigns on social media.
